

Protection is a snap.

At 16, you can get two vaccines (MenACWY, MenB) that can help protect against meningitis.

Meningitis is a rare but serious brain infection that can lead to brain injury, limb amputation, and in some instances, death. Symptoms can appear quickly.

You've got your whole life ahead of you. **Protect yourself now.**

As one strong voice, Unity Consortium addresses the unique challenges surrounding adolescent and young adult preventive healthcare and immunization. Funding for Unity's VAX@16 campaign is provided by our members, including vaccine manufacturers. [Please visit Unity4TeenVax.org](http://Unity4TeenVax.org)
